

FULL STACK WEB DEVELOPER

Nathaly Cuya

 [My Portfolio](#)  832 - 877 - 5878  NathalyCuya@utexas.edu  [Nathaly Cuya](#)  [My Github Page](#)

Objective

I am a Full Stack Web Developer proficient in HTML, CSS, Javascript, Nodejs, and SQL. I am a recent graduate from the University of Texas at Austin with A Bachelor's degree in Sociology. I gained many of my skills and experiences via The Thinkful Engineering Immersion Bootcamp. My goal is to use the technical knowledge I've gained thus far to build user-focused websites and mobile applications while also incorporating my creativity in every project I am a part of.

Technical Skills

Front End

HTML5 | CSS3 | JavaScript | JQuery | React | Wordpress

Backend

Node.js | PostgreSQL | Dbeaver | Postman

Other Technologies

R-programming | GitHub | Git | Vscope

Recent Projects

Plant-Pals: Find and Rate Indoor Plants | Vercel

Application: [Plant Pals: Find Indoor Plants](#)

The purpose of this application is to assist the user find an indoor plant based on their needs and other users' experiences. The user is able to browse through a directory of indoor plants where basic a summary of each plant is listed. The user may also read and leave reviews. A short quiz is also implemented as a tool for users to find a plant match. The app utilizes the following technologies: ReactJs, CSS, and Nodejs.

The API server was created using NodeJS, PostgreSQL, and DBeaver.

- Server: <https://desolate-woodland-19161.herokuapp.com/>
- Server Repository: <https://github.com/natcuya/plant-api>

Generic VS. Brand: Know Your Medication Quiz App | GitHub

Application: [Generic VS Brand: Know your Meds Quiz](#)

A quiz application that tests the users' knowledge of commonly prescribed medications. Each question is presented with four different answer choices in which the user is required to make a choice before moving forward. My inspiration for the content of this app stems from my current job as a pharmacy technician. This app could also be used as a study tool for the Pharmacy Technician Licensing Exam. The app utilizes the following technologies: JQuery, JavaScript, HTML, and CSS. The project was then pushed to Github.

Music & Mix Application | GitHub

Application: https://natecuya.github.io/music_mix/

The purpose of this application is to connect the user to upcoming music events/attractions while simultaneously presenting suggested artists/bands the user may also enjoy. The goal is to connect the user to new music experiences. This is achieved by using two popular APIs: TicketMaster and TastDive. The app utilizes the following technologies: JQuery, JavaScript, HTML, and CSS. The project was then pushed to Github.
